### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light-Moderate Initial Attack Activity
National	PL 4	New Fires and Acres: 43 fires for 67.15 acres / 36 acres Large Fire Growth

---

### Weather Summary:

#### ... Breezy Winds for Northern Areas of the Great Basin for Wednesday/Thursday.

A hot and dry airmass is moving into the Great Basin under a strong high-pressure system that will remain in place through the upcoming weekend. Temperatures will be very hot with maxes continuing near 100 degrees across the northern valleys. Minimum RHs will also be decreasing down into the single digits to low teens.

A low-pressure trough will move through the Pacific NW/Northern Rockies bringing an increase in winds to much of Idaho on Wednesday and across the northern half of the Great Basin on Thursday. High Risk triggers have been issued for these winds. Isolated dry thunderstorms are possible on the far northern fringe of the Salmon Challis NF on Wednesday. Limited southerly moisture may return to the southern half of the Great Basin for the weekend.

---

### Fuels/Fire Potential:

#### ... Fuels and Fire Behavior Advisory in effect for Utah, the Arizona Strip and Southern/Eastern/Central Nevada ...

#### ...Fire potential is on the increase regionwide this week with hot, dry, and breezy weather returning...

The upcoming warm and dry weather will cause fire danger values to increase once again to near the 90th -97th percentile over much of the Geographic Area this week.

Hold overs from recent lightning may pop up this week as humidity's decrease and winds pick up across the north.
